

Our realizations

INCREASE CAPACITY OF PRODUCTION LINES

TATASTEEL RAIL - Hayange

- Increased capacity of rolling rail 108 meters - Study Realization Mounting of transfer equipment hot and cold rolling rails output and workshop preparation CH3 rails
- Design Realization Mounting handling facility and heat treatment of rail 108 meters

KIHN Groupe VOSSLOH - Rumelange Luxembourg

- Design, supply, assembly shop, delivery, installation site and assist commissioning of a set of equipment for handling rails & integration of a saw for cutting to length

ARCELORMITTAL - Dunkerque

- Design, supply, assembly shop, delivery, installation site and assist commissioning of a set of equipment for handling rails & integration of a saw for cutting to length

PROFILARBED - Belval

- Design, manufacturing, installation of a discharge scrap rolling equipment coupled to the mill 2

ARCELORMITTAL - Gand (Belgium)

- Realization of a system of sheet sample taken online and adding a conveyor output coils (10X 35T. / Unit) on the pickling line

ARCELORMITTAL - Florange

- New stand for preparing the pickling line Sainte Agathe - automatic engagement: Opener - pinch - decurler punch and shear, exhaust system falls.
- Integration of a shear Butech and providing a sorting table output.
- Support spindle nose (SK48, Prep3, DG50)

ARCELORMITTAL CONSTRUCTION – Revigny

- Increase the capacity of galvanizing lines Galva 2. Integrating a horizontal battery replacement engine induction systems and line painting

THYSSENKRUPP PRESTA

- Establishment of an accumulator on-line degassing n°3
- Strengthening a tipping truck
- Integration of a block S with centering (EMG)
- Security online process

ARCELORMITTAL - Florange

- Various stands inspection sheets (coupling 4 cages, cages 5, LI72, Prep 3)
- Integration of the automatic shears output SKIN PASS
